

ANKUSH KAURA

Full-Stack & AI Systems Engineer Odoo · Node.js · Flutter · LLM automation

Chandigarh, India · +91 95019 59195 · amkauras@gmail.com · ankushkaura.in · github.com/ankush-kaura

PROFILE

Full-stack engineer who builds the software a business actually runs on: ERP systems, customer portals, mobile apps, and now the AI inside them. **8+ years and 30+ shipped products** for healthcare, government, education, retail and logistics clients across India, the UAE, Europe and the US. I usually own the whole job, from the database design to the live server. Today my focus is Odoo 18/19, AI automation and WhatsApp-first products.

SKILLS

AI & automation: LLM integration, OCR + LLM document extraction, AI-driven QA, RAG search, agent tooling (Claude Code, MCP)

ERP & platforms: Odoo 18/19 (Python, OWL, QWeb), ERPNext/Frappe, Shopify (Liquid, apps), Salesforce (Apex), Strapi, headless WordPress

Backend: Node.js, Express, Hono, Python, PHP (CakePHP, Laravel), Go, GraphQL, REST, Socket.io, WebRTC/Jitsi

Frontend & mobile: React, Next.js, Angular, Vue, Astro, Tailwind CSS, Flutter, React Native

Data & cloud: PostgreSQL, MySQL, MongoDB, Redis, Firebase · AWS (Lambda, API Gateway, Cognito, SNS, EC2), Azure Blob, Docker, k3s, Nginx, Cloudflare

Ways of working: Agile delivery, Playwright and unit/integration testing, GitLab CI, Figma, Miro

EXPERIENCE

Master Software Solutions, Mohali · AI Systems Engineer

May 2019 – Present

- **Delivered** 30+ client and in-house products, usually as the person who owns the data model, the API, the web and mobile front ends, and the deployment.
- **Built Odoo 18 and 19 ERP modules** for delivery and subscription businesses: a 17-module multi-tenant SaaS rebuild, route planning on an in-house vehicle-routing solver, and a driver app with proof of delivery and cash collection.
- **Put AI where it saves real hours:** an Odoo module that reads supplier bills and purchase orders with OCR and an LLM, and a QA pipeline that tests each merge request against its acceptance criteria, files proven bugs with screenshots and holds the merge until a tester signs off.
- **Launched WhatsApp-first products:** a campaign platform (live, 248 automated tests) and a garage-management app with GST invoicing and estimate approvals over WhatsApp.
- **Designed the zero-downtime migration** for a live delivery SaaS (40+ payment gateways, 9 languages, customers in India, the US and the UK), moving it from a CakePHP monolith to a modular Laravel and Flutter stack.
- **Worked on-site** in Abu Dhabi for Agthia Group, deploying backend services integrated with SAP.

Inext Solutions, Chandigarh · Junior PHP Developer

Jan 2018 – May 2019

- Wrote PHP backend modules for e-commerce stores and government portals.
- Rewrote and indexed slow MySQL queries to speed up pages and reports.

Parse Techno Measure, Ambala · Intern, Python & JavaScript

Jan 2016 – Nov 2017

- Built custom analytics tools in Python and JavaScript and took part in code reviews and bug fixing.

Axiom Consulting, Noida · Junior Technical Consultant, MS Dynamics

Jan 2015 – Jul 2015

- Set up and configured Microsoft Dynamics for key accounts and supported clients through migration and go-live.

SELECTED PROJECTS

Delivery & Subscription ERP · Odoo 19, Python, OWL, PostgreSQL

Rebuilt a legacy SaaS for daily doorstep delivery (milk, water, groceries, paid from a prepaid wallet) as 17 Odoo modules, with company-level tenancy so every business gets its own branded setup.

Route Planning & Driver App · Odoo, React Native

Dispatch board backed by a custom route solver, and a driver app with background tracking, photo, video and signature proof of delivery, cash collection at the door and a live KPI dashboard for dispatchers.

Shopify Payments to Odoo Reconciliation · TypeScript, PostgreSQL, Odoo 19

Turns every Shopify payout into one balanced journal entry that matches the bank deposit to the cent. Verified against a live Odoo, 450+ automated tests, with a Zoho Books adapter on the way.

AI Bill & Purchase Order Import · Odoo 18, OCR, LLM

Reads supplier bills and purchase orders from PDFs and creates draft records in Odoo, so the accounts team checks data instead of typing it.

WhatsApp Campaign Platform · TypeScript, Go, Flutter, Docker

Self-hosted broadcast and drip campaigns with segmentation, a live phone preview, multi-number rotation, anti-ban pacing, delivery tracking and role-based access.

Grease, garage management for India · Next.js 15, Hono, offline-first PWA

Job cards, GST-compliant invoices and WhatsApp estimate approvals, with Hindi and Punjabi support, built to keep working when the shop's internet does not.

Also built: Minutely, a Chrome extension that writes meeting minutes with AI and keeps data in the user's own Google Drive · FORGE, an offline Flutter gym tracker with a 600+ exercise library · a headless WordPress + Next.js site for a medical clinic · ankushkaura.in, with an "ask my portfolio" AI assistant.

EARLIER CLIENT WORK

- **Healthcare:** Illuminate Health (pharmacist-led medication management with vitals and alerts), KLIIT (online doctor consultations on Firebase), Ensan Care (home-visit doctor booking, React Native), Healthy Way Labs (lab software that pulls results from equipment and sends reports on WhatsApp).
- **Government:** Punjab Police systems during COVID-19: HAWK (digital FIR records), BPT (promotion exams) and PESA (essential services and emergency alerts), on CakePHP, PostgreSQL and React. Agthia Group, UAE: Agrivita, Store 1971 and Al Ain Water.
- **Education:** 3ILive, a virtual school with live classes, whiteboard, assignments and parent-teacher meetings, and School of Rock, an online music school. Both on React, Node.js and Jitsi.
- **Marketplaces & consumer apps:** Reela and Noua (multi-vendor marketplaces with vendor subscriptions), Geese Protect (on-demand security guards), PIC'D (a social network for photographers with live maps), G-music (streaming), SivApp (food delivery, Spain), Fifth Labor (event staffing), Armstrong (supply chain on Strapi and Azure).
- **Salesforce & Shopify:** Salesforce administration and Apex development for NORSE Global. Custom themes and apps for 13+ Shopify stores, including BestSmokeShop, Incognito365, Kuthaus Beauty and Palm Beach Boutique.

EDUCATION

B.Tech, Electronics & Communication Engineering · RIMT, Gobindgarh · 72% 2012 – 2015

Diploma, Electronics & Communication Engineering · RIMT, Gobindgarh · 69% 2009 – 2012

CERTIFICATIONS

Google Cloud Platform Fundamentals and **GKE Fundamentals**, Google Cloud on Coursera

BEYOND WORK

Led my college team at an inter-college robotics championship, recognised for home-automation and farming ideas. Coordinated inter-college competitions, and volunteer with local NGOs teaching underprivileged children.
